

REMARKS

Applicants thank the Examiner for her careful review of the specification. Pursuant to the Examiner's request, Applicants have amended the specification to add the sequence identification numbers where necessary and to correct several inadvertent typographical errors. Furthermore, for the convenience of the Office of Patent Publications and pursuant to a request from the Examiner, all amendments previously made during prosecution to the originally filed specification have been included in this Amendment. Because all amendments to this substitute specification are being provided in this Amendment, the Office need not review the prosecution file for any additional amendments to the substitute specification submitted concurrently herewith.

No new matter is added by these amendments, and these amendments are fully supported by the application as filed.

Applicants believe no fees are due for submission of this paper or the other documents submitted herewith. However, in the event any additional fee is due, please charge Deposit Account No. 50-0990 for any additional fees associated with this paper or during the pendency of this application, including any extensions of time for consideration of the documents enclosed.

CONCLUSION

In view of the foregoing, Applicants respectfully request that the application proceed to issuance. If any further information or action is needed, the Examiner is invited to telephone the undersigned at (650) 298-5809.

Respectfully submitted,

Margaret A. Powers
Attorney for Applicants
